Professional Summary

I'm a Computer Science graduate, proficient in web design and development with experience since 2022. I build responsive, and user friendly websites for businesses and individuals, using HTML, CSS, JavaScript, and WordPress to turn their ideas and needs into practical solutions. My experience includes designing websites, integrating APIs, and improving performance across all devices. I also develop blockchain applications and automation tools, with additional skills in IT support. I bring strong problem solving, communication, and teamwork skills, with attention to detail and a willingness to learn, wherever I find myself
